Placement Committee

Chairs: Sandra Black (sblack@columbia.edu), Mark Dean (mark.dean@columbia.edu)
Administrators: Amy Devine (aed2152@columbia.edu), Rosa Lourentzatos (rcl2109@columbia.edu)

Education

Columbia University	New York, United States
<i>Ph.D. in Economics</i>	2019 - Present
<i>M.Phil. in Economics</i>	2022
Seoul National University	Seoul, Republic of Korea
<i>B.A. in Economics</i>	2009 - 2016

Research Interests

Macroeconomics, International Economics, Finance

Job Market Paper

The Synthetic Dollar Funding Channel of US Monetary Policy

This paper proposes a novel transmission channel of US monetary policy through the FX swap market: the *synthetic dollar funding channel*. First, I show empirically that a contractionary US monetary policy shock widens deviations from covered interest rate parity (CIP) in the post-global financial crisis period. Then, I construct a two-country New Keynesian model with financially-constrained banks and an FX swap market. In the FX swap market, US banks are suppliers of synthetic dollar funding and obtain CIP deviations as intermediation fees arising from the limit to arbitrage while non-US banks are demanders for matching currencies for holding US capital. In equilibrium, CIP deviations are endogenously determined so that the FX swap market clears. From the calibrated model, a contractionary US monetary policy shock widens CIP deviations because it tightens the leverage constraint of US bank. This implies that the gap between cost of synthetic dollar funding and direct dollar funding becomes larger. Then, spillover to non-US and spillback to US output, investment, and inflation are amplified compared to the counterfactual case in which CIP holds. Finally, I show that central bank swap lines can attenuate the synthetic dollar funding channel of US monetary policy.

Working Papers

Optimal Central Bank Swap Line Policy

This paper studies the optimal central bank swap line policy. Due to a pecuniary externality, there is a trade-off between ex-ante and ex-post efficiency of the swap line policy. During financial crises, the

swap line policy lowers CIP deviations and prevents fire sale of source currency assets, beneficial to both recipient and source country. However, it makes recipient banks to overborrow ex-ante, sowing the seeds of financial crises. From a global welfare point of view, the ex-post efficient policy is more lenient than the ex-ante efficient policy, which implies time inconsistency. The policy mix with macroprudential policies can correct the overborrowing problem and resolve time inconsistency. Moreover, policy coordination of a cooperative Ramsey problem obtains undersupply (oversupply) of source currency provision under a realistic condition when the source country has higher (lower) bargaining power.

The Effects of Monetary Policy under Dominant Currency Pricing and Dominant Currency Financing

This paper investigates effects of domestic and foreign monetary policy under dominant currency pricing and dominant currency financing. For this purpose, I construct a small open economy New Keynesian model with a working capital constraint. Due to the need for working capital for importing intermediate inputs, dominant currency pricing and dominant currency financing are complementary. Under the working capital constraint, the depreciation of the dominant currency is not sufficient for predicting trade volume. Even though both the expansionary domestic monetary policy and the contractionary foreign monetary policy lead to the depreciation of the domestic currency, trade volume move in the opposite direction since monetary policy affects marginal costs through working capital constraint. Finally, I extend the model by including non-tradable sectors, which amplifies the response of trade volume to monetary policy shock since profits of non-tradables are not insulated from the depreciation.

Research Experience

Federal Reserve Board , Division of International Finance Dissertation Fellow	Jun 2024 - Aug 2024
Columbia University , Department of Economics Research Assistant for Professor Stephanie Schmitt-Grohé	Aug 2022
Bank of Korea , Research Department and Communications Department Junior Economist	Jan 2016 - Jul 2018

Teaching Experience

Columbia University , <i>Teaching Assistant</i>	New York, United States
Intermediate Macroeconomics (Undergraduate, Émilien Gouin-Bonenfant)	Spring 2024
Macroeconomic Analysis I (M.A., Julian di Giovanni)	Fall 2023
Intermediate Macroeconomics (Undergraduate, Martín Uribe)	Spring 2023
International Macroeconomics (Undergraduate, Stephanie Schmitt-Grohé)	Fall 2022
Macroeconomic Analysis II (Ph.D., Stephanie Schmitt-Grohé)	Spring 2022

Corporate Finance (Undergraduate, Ethan Namvar)	Fall 2021
Introduction to Econometrics (Undergraduate, Seyhan Erden)	Spring 2021
Macroeconomic Analysis I (M.A., Ronald Miller)	Fall 2020

Fellowships, Honors, and Awards

Dissertation Fellowship, <i>Columbia University</i>	2024 - 2025
Wueller Teaching Award, <i>Winner, Columbia University</i>	2024
Dissertation Fellowship, <i>Federal Reserve Board</i>	2024
Wueller Teaching Award, <i>Runner-up, Columbia University</i>	2022
Wueller Teaching Award, <i>Winner, Columbia University</i>	2021
Dean's Fellowship, <i>Columbia University</i>	2019 - 2024
Doctoral Study Abroad Scholarship, <i>Korea Foundation for Advanced Studies</i>	2019 - 2024
Governor's Award for Academic Paper Competition, <i>1st prize, Bank of Korea</i>	2017
Eminence Scholarship, <i>Full scholarship, Seoul National University</i>	2014

Conference and Seminar Presentations (* SCHEDULED)

2024: European Winter Meeting of the Econometric Society*, Annual Carey Finance Conference, 19th WashU Economics Graduate Student Conference, Asia Meeting of the Econometric Society in East & Southeast Asia, Federal Reserve Board Dissertation Fellowship Seminar, 30th CEF Conference (declined), 23rd Macro-Finance Society Workshop, Columbia Macroeconomics Seminar
2023: Columbia Macroeconomics Seminar
